Concept - Mapping

Name :- K. Rama keerthi

Reg No :- 192312495

Course Code :- ITA 0502

Course Name :- Computer vision

①

Computer vision overview
* Enables machines to interpret visual information
* use imagiveness uncertain
* Combines image to processing machine learning and AI

Image sensing and Acquisition
→ Cameras (front, side, rear, 360°).
→ capture light from the engagement
→ less + image sensors

Digital - Image fundamentals
→ Image + 2D array of pixels
→ Pixel value represent
→ Grayscale
→ Resolution, control

sampling and the quantization
* sampling concept signal to digital
* Quantization map to finite intensity.
* Affects image quality

Features of computer vision
* Real time processing
* High, accuracy & reliably
* 3D administrating scope analysis

levels of Computer vision and image
→ low filtering constant direction
→ Mid feature extenes
→ High level extinguisher

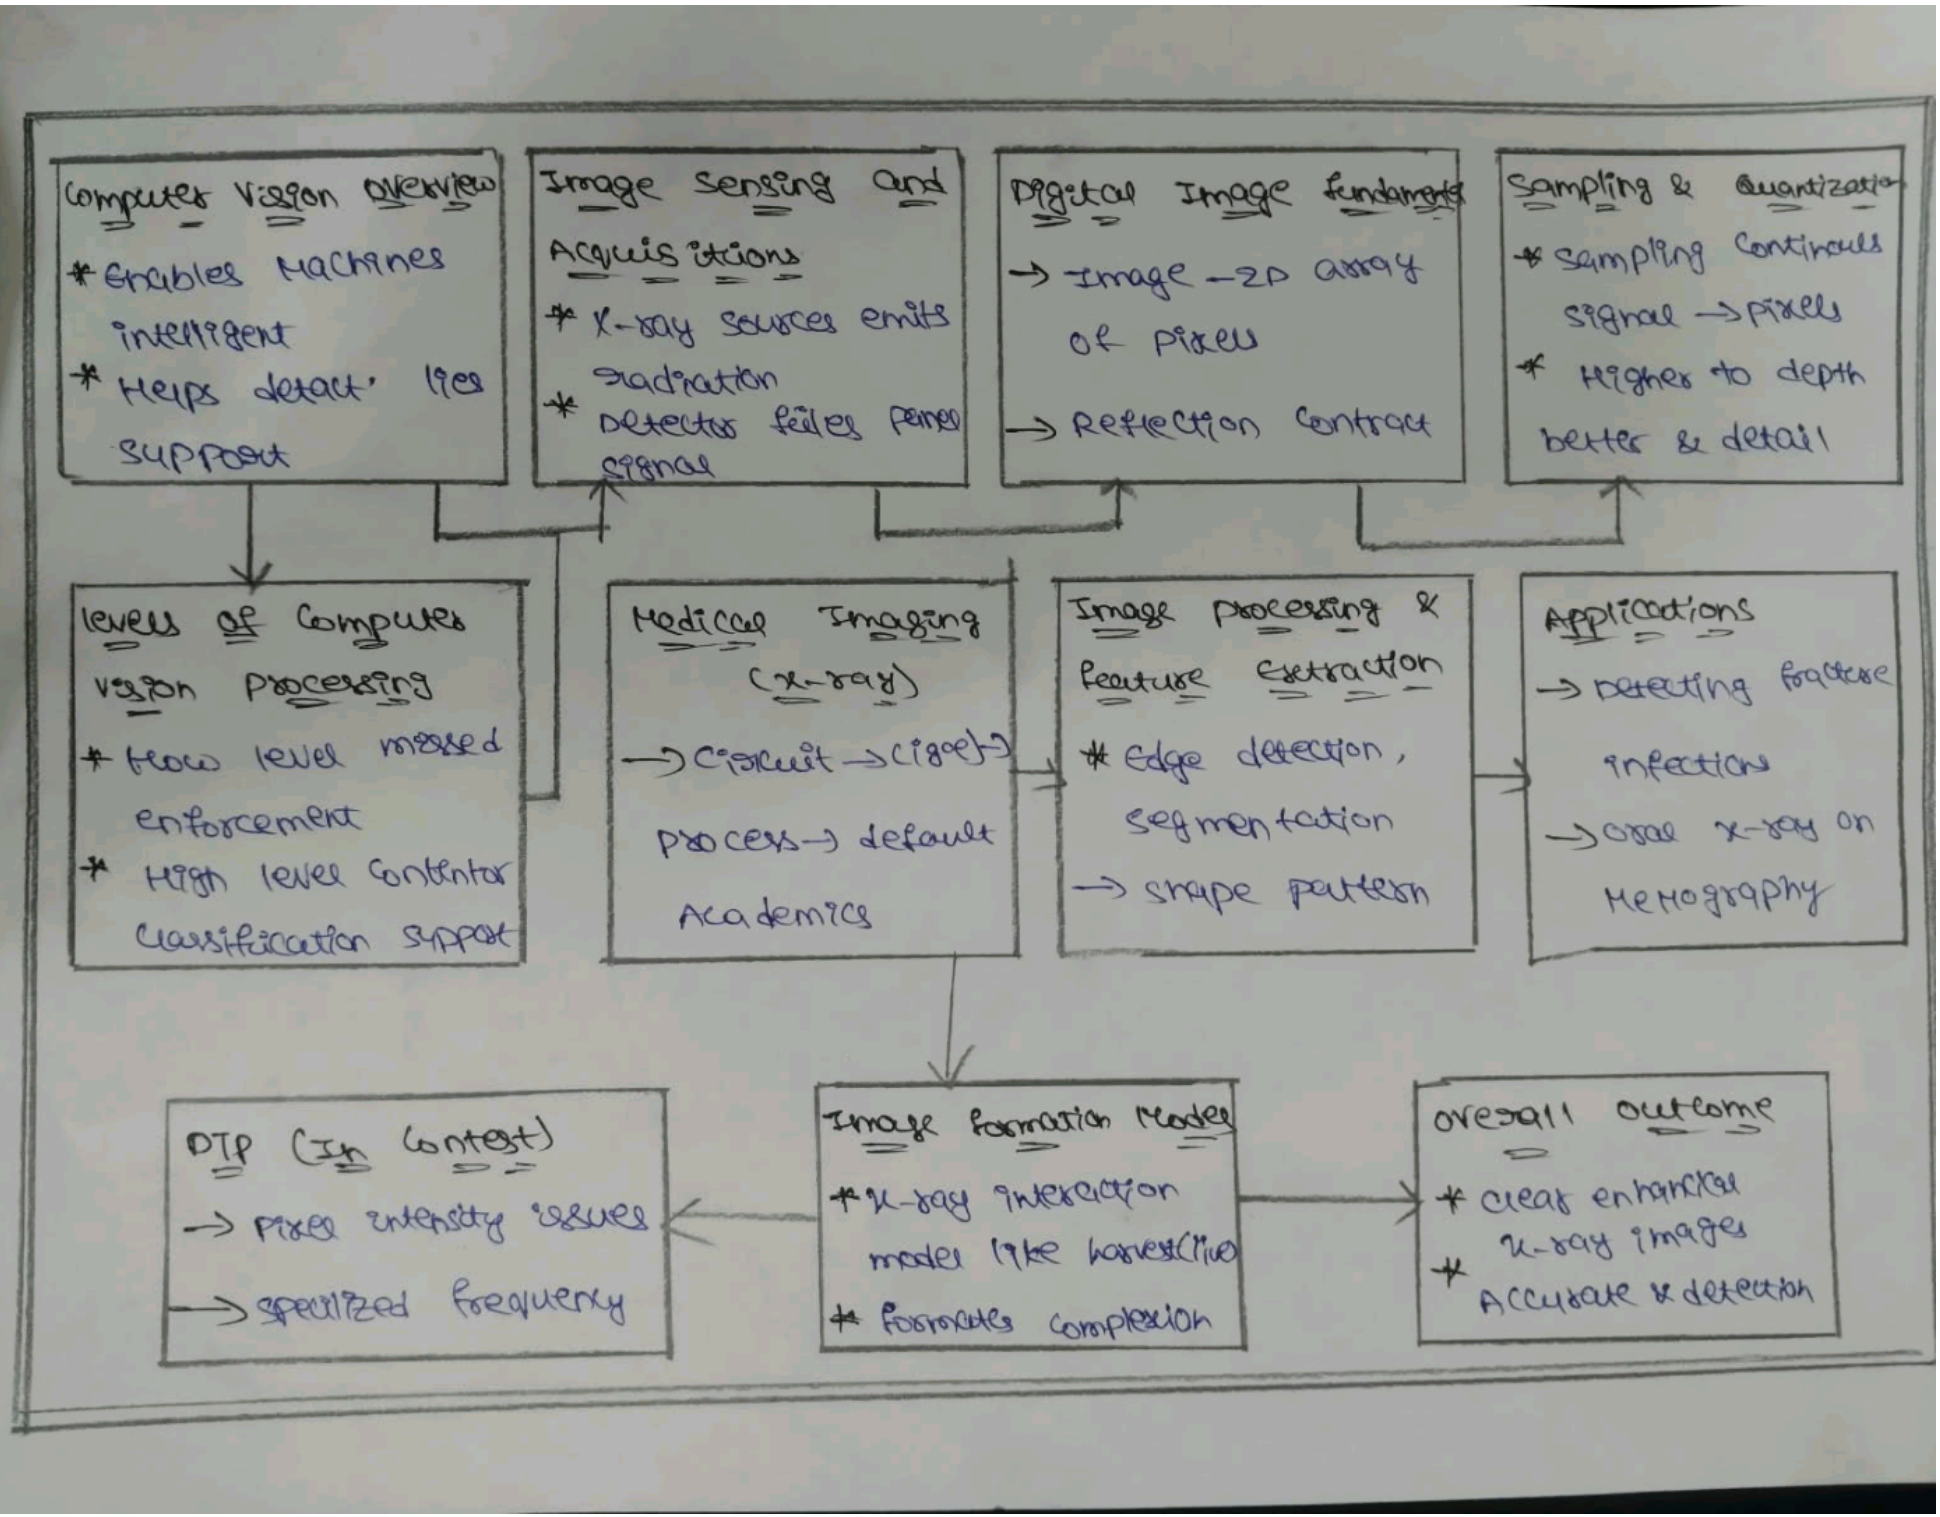

computer Vision in Autonomous
* Captures - process ↓ extracts features
* support extract Regression

Object Recognition using (ML/DL).
→ Data prediction
→ CNN, YOLO, SSD
→ 3D deep question

Navigation & decision making
* understands road, traffic signals understand speed helps in real one desires

Applications
→ Autonomous desire
→ Traffic Monitoring
→ fuel safety

(2)

Computer Vision overview
* Enables Machines intelligent
* Helps detect' lges support
Image sensing and Acquisitions
* X-ray sources emits radiation
* Detector feiles perse signal
Digital Image fundamenta
→ Image - 2D array of pixels
→ Reflection Contract
Sampling & Quantizatio
* Sampling Continouls signal → pixels
* Higher to depth better & detail
levels of Computer vision processing
* Low level missed enforcement
* High level Contentor Classification support
Medical Imaging (x-ray)
→ Circuit → (ige)
process → default Academics
Image processing & Feature extraction
* Edge detection, segmentation
→ shape pattern
Applications
→ Detecting fracture infections
→ Oral x-ray on Mammography
DIP (In Contest)
→ Pixel intensity issues
→ specified frequency
Image formation Model
* X-ray interaction model like Lambertian
* Formulate completion
overall outcome
* Clear enhanced x-ray images
* Accurate & detection
